RUFAIDA SALMAN

MERN STACK DEVELOPER

Faisalabad, Pakistan | 03047555628 | rufaidasuleeiman@gmail.com | linkedin.com/in/rufaida-salman-b14b02385

SUMMARY

Results-driven MERN Stack Developer with over 2 years of professional experience designing, building, and deploying full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in building component-based, responsive user interfaces with React.js, managing application state with Redux Toolkit, and engineering secure backend systems with RESTful APIs and JWT authentication. Adept at database schema design and query optimization in MongoDB. Passionate about clean code architecture and delivering seamless user experiences.

CORE SKILLS

Frontend: React.js, JavaScript (ES6+), Redux Toolkit, Context API, Tailwind CSS, Bootstrap, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware Development

Database: MongoDB, Mongoose, CRUD Operations, Database Schema Design

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Google Maps API

EXPERIENCE

MERN Stack Developer | FixLab **2025 – 2026**

- Work as a MERN Stack Developer, independently designing and building full-stack web applications across the frontend and backend.
- Build and integrate RESTful APIs connecting React.js front ends to Node.js/Express.js backends, with data persistence in MongoDB.
- Implement CRUD operations and design MongoDB schemas using Mongoose for scalable, maintainable data management.
- Follow Git/GitHub version control workflows and write clean, reusable component-based code.

MERN Stack Developer | AppCrates (Remote) **2024 – 2025**

- Developed and maintained full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built reusable, component-based React.js interfaces and integrated them with RESTful backend services.
- Collaborated with cross-functional teams to design and implement new features, following Git/GitHub workflows.
- Optimized MongoDB queries and schemas to improve application performance and scalability.

MERN Stack Developer | CodeMelding **2023 – 2024**

- Contributed to the design and development of full-stack web applications using the MERN stack.
- Built and consumed RESTful APIs, implementing JWT-based authentication for secure user sessions.
- Assisted in structuring MongoDB databases and writing Mongoose schemas for application data.
- Wrote clean, maintainable, component-based code following industry best practices.

PROJECTS

Travel Agency Booking Platform | In Progress

- Building a full-stack MERN travel booking platform where users can search, view, and book travel packages.
- Developing an admin panel for managing travel packages and bookings.
- Integrating Google Maps for location-based package browsing.
- Using Redux Toolkit for centralized application state management across the app.
- Core features (search, booking, admin panel, maps, state management) are largely complete; payment integration is planned for a future phase.

CERTIFICATIONS

MERN Stack Development | Legacy

EDUCATION

Bachelor of Science in Software Engineering | Virtual University of Pakistan | 2024 – 2028

- Coursework: Programming, Data Structures, Database Systems, Software Engineering.
- Gaining hands-on experience through academic and self-directed full-stack MERN projects.
